What is Smart Asset Solutions?

Smart Asset Solutions is a modern, intelligent stock management platform that transforms how you store, track, and replenish the materials and tools that keep your business running.

Through connected devices, QR/NFC tracking, and automated monitoring, the system gives you real time insights

Usage Patterns

Understand exactly what's being used and when

Spend Visibility

Clear breakdown of usage and cost across teams or locations

Asset Tracking

Know where your tools and equipment are at all times

Live Stock Levels

Real-time visibility across vans, stores, depots, and sites

Performance Dashboards

Monitor stock health, turnover, and optimisation opportunities

Reorder Triggers

Automatic flags when stock hits minimum levels

How it Works

Smart Asset Solutions is available in three flexible formats designed to suit how your business works:

Smart Van

Perfect for electrical engineers, contractors, and mobile teams

- Track all van stock in real time
- Automate replenishment directly from your local YESSS branch
- Scan QR codes or tap with NFC to book out tools, equipment, or consumables
- Prevent lost tools and unplanned downtime

Smart Portal

Your centralised online dashboard

- Live reporting across all vans, stores, teams, and locations
- Real-time alerts for replenishment
- Track spending, usage trends, and stock movements
- Export data for audits, compliance, or financial planning

Smart Store

Ideal for workshops, depots, and customer stores

- Smart bins, cabinets, or shelving for complete stock control
- Automatically monitor usage and reorder thresholds
- Engineers book items out using QR codes or NFC
- Real-time visibility of on-site availability

Simple Monthly Subscription

Enjoy full access to the platform, hardware, reporting, and support — without large upfront investment.

How the System Works Together

Scan or Tap

Engineers use QR codes or NFC to book out tools, equipment, or stock.

Instant Update

The system tracks stock levels and reports everything in real time to the Smart Portal dashboard.

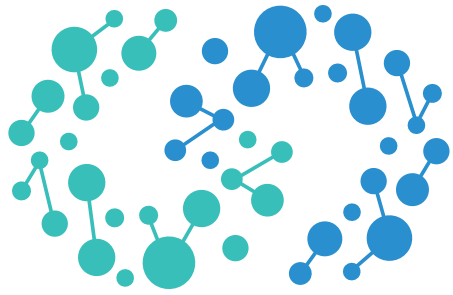

Automatic Replenishment

When items reach minimum levels, your YESSS branch, nominated supplier or purchasing department is automatically notified.

Delivery & Optimisation

Stock is replenished quickly, and your dashboard highlights opportunities to reduce waste and improve efficiency.

No manual stock checks. No emergency orders.

Why customers choose Smart Asset Solutions

Save Time

Automated tracking and replenishment free your team from stock counting and admin

Reduce Waste

Prevent over-ordering, stock loss, and duplicated purchases

Increase Productivity

Keep your engineers fully stocked with the materials they need to work efficiently

Improve Cost Control

See exactly where your stock goes — and where savings can be made

Stay Fully Stocked

Never run out of critical items thanks to automated branch replenishment

Benefit From a Local Partner

Your local YESSS branch can provide installation, support, system adjustments, and ongoing stock supply

Take control of your stock with Smart Asset Solutions.
